

A Message Regarding Coronavirus (COVID-19)

August 28, 2020

We are greatly inspired by the many efforts initiated in response to the COVID-19 pandemic and are more committed than ever to do our part. To help address urgent community needs, the Three Arches Foundation immediately gave its 2020 grant recipients the flexibility to reallocate grant funding towards their most pressing demands and unanticipated effects of this crisis. The Foundation also created the "COVID-19 Response Fund" that provided eight local nonprofit organizations with grant resources towards unforeseen needs and to ensure continued focus on access to care. Additionally, we joined with philanthropic funders across Northeast Ohio to provide emergency relief during the first phase of the Greater Cleveland COVID-19 Rapid Response Fund with our contribution receiving geographic priority towards efforts that directly impact people in Lakewood and surrounding communities.

As we continue to navigate the Coronavirus pandemic, we are closely monitoring and taking proactive measures to support the community that is at the heart of everything we care about. Please know we actively partake in conversations with local nonprofits, public officials and philanthropic partners to better understand the changing needs of our community and actions underway to mitigate the ongoing impact of this pandemic. We are grateful to have the leadership of these many organizations even as they manage the well-being of their own staff and internal operations.
